

St. Ephrem Academy

Traditional Values, Next Generation Learning

St. Ephrem Catholic Academy is happy to be joining the celebration of Catholic Schools Week for the first time.

The new pre-k3 through eighth grade academy was formed from St. Ephrem Catholic School and continues the great tradition established and upheld for over 90 years of service to the community.

During this year's Catholic Schools Week, St. Ephrem Catholic Academy will proudly highlight all of the new and exciting programs that are being offered to students. An open house on Sunday, Jan. 27 will begin the weeklong celebration, and will be an opportunity for the community to how St. Ephrem Catholic Academy can best serve them and their children.

St. Ephrem Catholic Academy is a model of traditional values and new ideas. The Latin and Greek Roots program establishes a foundation for students' understanding of language from kindergarten through eighth grade.

Daily class Masses remind students why they are in a Catholic school and the sacramental preparation programs allow

students to fully participate in their faith. These are the strong ties to both tradition and faith.

St. Ephrem Catholic Academy also embraces the future of learning. The junior high features a 1:1 Chromebook learning environment with an alternative seating model that gives students the flexibility to learn in comfort.

Bringing Science to Life

A state-of-the-art STEM lab brings science to life with hands-on learning as the driving force behind the program. The third through fifth grades feature 1:1 iPad integration so that teachers can adapt activities and learning to meet each child's needs, and a modern computer lab gives students the skills they will need to succeed. The forward-thinking programs of St. Ephrem Catholic Academy bring students into tomorrow's classrooms today.

As a Catholic school, St. Ephrem Catholic Academy is committed to making sure that every child succeeds. The academy features Title 1 services in math and

reading as well as guidance through PDHP. The newest addition to the building is a full-time and fully certified Orton-Gillingham Resource Room teacher. For students who struggle in reading skills or display signs of dyslexia, one-on-one services give children the foundation they need to learn and grow as readers.

There are so many wonderful things happening at St. Ephrem Catholic

Academy that a list of any length would not suffice. The only way to truly understand is to see it firsthand. From top state test scores to a year-round sports program, from traditional values to next generation standards, St. Ephrem Catholic Academy is leading the way in Catholic education. Get a small glimpse of what St. Ephrem Catholic Academy offers during an Open House, Jan. 27.
