Help Needed for Kidney Transplant

Petar Vukelich

Petar (50) was born and raised in Sunnyside, NY. Happily married with three beautiful daughters. An active member of the Sunnyside/Woodside community.

He needs your help as he is reaching end-stage renal failure.

Petar and his family need your support to get him through this affliction. There are many ways to help. Either by sharing his story or becoming part of his story.

Petar is looking for a selfless person, who wants to be part of something bigger, someone to save his life.

It starts with a phone call to our Living Donor Ambassadors at Northwell Health. They will answer any questions you have and lead you down the path to becoming a kidney donor. The importance of finding a living donor is paramount. It dramatically improves outlooks and long term prognosis.

-Kidney donors resume a totally normal life -no meds, no lifestyle or dietary restrictions.

-No monetary obligations -as all costs are covered by the recipient's insurance.

-Most importantly we only need one kidney to live a long healthy life.

Thank you for considering such a beautiful gift to a friend in need. God Bless You!
